

Science On The Go, Inc. Presents:

# Red Ribbon Week Presentation

Science On The Go's *Healthy Bodies, Healthy Minds* assembly program takes students on a journey through the **Body Systems**. We explore the building blocks of how the human body works, the jobs of the skeleton and muscles, how the heart and lungs keep us alive, and most importantly, what we can do to keep it all healthy!

The *Healthy Bodies, Healthy Minds* program also covers drug education, and students learn about the effects smoking and alcohol have on the body, making this a perfect complement to your school's **Red Ribbon Week** activities.

This **hands-on program** is an incredible learning experience with a phenomenal display, energetic presenters and exciting scientific specimens.

**Pricing:** \$425 (travel fee may apply)  
**Duration:** One full hour  
**Audience:** Appropriate for ALL ages!  
**Setup:** Requires 32 l.f. table display
